MEMORANDUM OF UNDERSTANDING

We, the representatives of the organisations signed, taking into account the responsibilities we have taken for the education and prevention of our children and our European societies, and based on the values of the Civil Protection Policy of the European Union,

Recognise

- A. The need for improved communication and coordination among the several interests involved in disaster prevention and kids' education;
- B. That there exists a need to coordinate projects and programs of mutual interest;
- C. Such improved communication and coordination can best be accomplished through the follow up of the results and the know-how embodied in the School Curriculum, elaborated by the Youth Prevention Project

This School Curriculum we consider useful and easy to apply into the external education curricula of the schools we have access and responsibilities for.

We believe that by developing a critic number of trained pupils on the Youth Prevention Project School Curriculum, we should assure the spreading of the prevention wave to cover the rest of the pupils, their family members and our societies.

This agreement shall become effective for each organisation upon signature below.

This project is realized with the contribution of the Civil Protection Financial Instrument of the European Union
